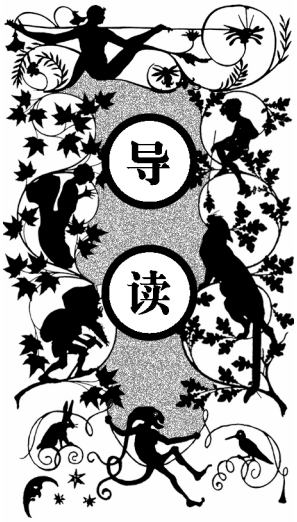
第三章　埃里叶巨峰

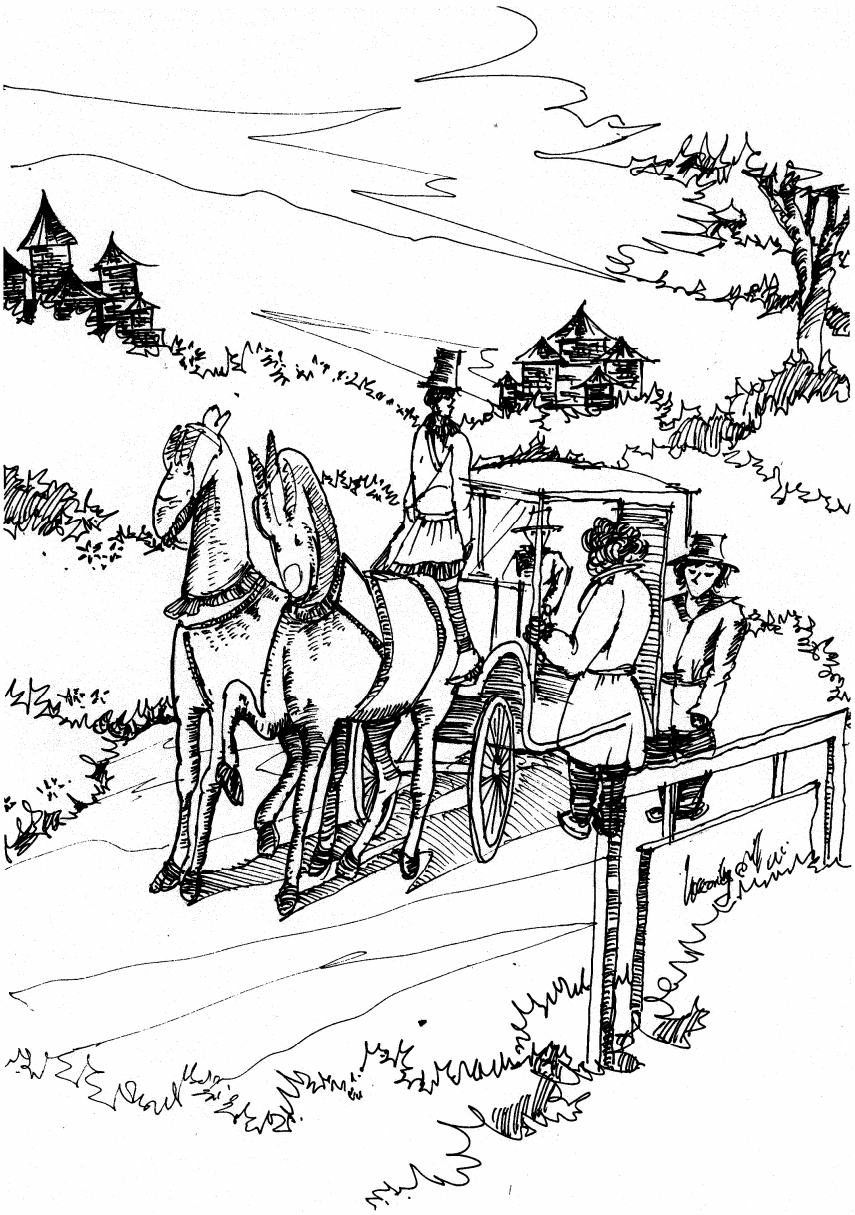
Chapter 3　The Great Eyrie



第二天一早，史密斯和斯特拉克乘着两匹马拉的车，带着足够两三天的干粮和三十岁的哈里·霍恩及二十五岁的詹姆斯·布鲁克两位向导上路了，市长为了狩猎还带了一杆长枪和猎犬尼斯柯。

傍晚，他们到达欢乐田园村，受到了村长的热情接待，村长告诉他们最近没发现任何可疑的情况。次日，即四月二十九日，他们一早就出发了，中午时，他们已经能看到六英里外的峰顶，看到上面稀疏、矮小的树木，他们谈起了巨峰，史密斯表示自己没登过峰顶，向导也表示自己也没有看到过高耸的巨峰，市长表示一定要登上这座从前没有人登上过的巨峰。五点钟时，他们在威尔顿农场停下，和佃户一起在一张大桌子上用了晚餐。

第二天天亮前，他们就做好了出发的准备。攀登开始了，两位向导在前面找路，他们登上了一条狭窄的峡口，一条小溪在他们脚下流淌，但显然不是从巨峰里流出的。一小时后，山坡越来越陡，他们一会儿向左，一会儿向右，最后山坡上连立足之地都没有，只好跪下抓着树爬行。市长鼓励大家要坚持住，并说现在才明白为什么没人能攀上峰顶；詹姆斯表示，从这里根本上不了山顶。他们盲目地向前走着，有时，他们甚至登不上詹姆斯所到的地方，原计划十一点到达峰顶是不可能的。十一点时，他们到了密林边缘，他们坐下休息，吃了些干粮。两位向导看着陡峭的山峰，表示很难攀登，斯特拉克认为如果没攀到峰顶就回去，对自己的好奇心是一



准备乘马车出发

个打击，而且他也难以面对沃德先生。

半小时后，他们跟在向导后面又出发了。霍恩独自跑到前面想找一条路。二十分钟后他带领大家向西北方向前进，他们走在光秃秃的山坡上，抓着一些细小的灌木，走了好长时间才前进了二百英尺。他们来到一个大裂口旁，地上有些断树枝及碎成粉末的巨石，于是行进速度加快了。十一点时，他们到了滑槽的前端不到一百英尺的地方，那里是高一百多英尺的石壁，这是通往巨峰的最后一处障碍，但望上去却无法攀登。史密斯让大家休息一会儿，十分钟后，他们沿着石壁底部边缘环绕，看到了神奇的巨峰。他们在底部环绕一周，没有一处能登上一百英尺高的石壁，他们都感到十分沮丧。他们听不到任何可疑的响动，看不到烟雾和火光，也没有任何火山爆发的征兆。巨石壁的高度在一百二十英尺到一百五十英尺之间，但如果不知道石壁的厚度，就不能估计其中的空间。

三点钟时，史密斯不耐烦地表示要回去；斯特拉克深感难过，虽然自己坚强而有耐心，但也无能为力，便向巨峰望了一眼，随他们一起下山。五点，他们回到了威尔顿农场，在那里吃了晚餐，八点半便回到了欢乐田园村。当晚，斯特拉克辗转难眠，他要准备下一次攀登。于是，次日晚斯特拉克乘火车前往华盛顿向沃德先生报告。

The next day at dawn, Elias Smith and I left Morganton by a road which, winding along the left bank of the Catawba River, led to the village of Pleasant Garden. The guides accompanied us, Harry Horn, a man of thirty, and James Bruck, aged twenty-five. They were both natives of the region, and in constant demand among the tourists who climbed the peaks of the Blueridge and Cumberland Mountains.

A light wagon with two good horses was provided to carry us to the foot of the range. It contained provisions for two or three days, beyond which our trip surely would not be protracted. Mr. Smith had shown himself a generous provider both in meats and in liquors. As to water the mountain springs would furnish it in abundance, increased by the heavy rains, frequent in that region during springtime.

It is needless to add that the Mayor of Morganton in his role of hunter, had brought along his gun and his dog, Nisko, who gamboled joyously about the wagon. Nisko, however, was to remain behind at the farm at Wildon, when we attempted our ascent. He could not possibly follow us to the Great Eyrie with its cliffs to scale and its crevasses to cross.

The day was beautiful, the fresh air in that climate is still cool of an April morning. A few fleecy clouds sped rapidly overhead, driven by a light breeze which swept across the long plains, from the distant Atlantic. The sun peeping forth at intervals, illumined all the fresh young verdure of the countryside.

An entire world animated the woods through which we passed. From before our equipage fled squirrels, field-mice, parroquets of brilliant colors and deafening loquacity. Opossums passed in hurried leaps, bearing their young in their pouches. Myriads of birds were scattered amid the foliage of banyans, palms, and masses of rhododendrons, so luxuriant that their thickets were impenetrable.

We arrived that evening at Pleasant Garden, where we were comfortably located for the night with the mayor of the town, a particular friend of Mr. Smith. Pleasant Garden proved little more than a village; but its mayor gave us a warm and generous reception, and we supped pleasantly in his charming home, which stood beneath the shades of some giant beech-trees.

Naturally the conversation turned upon our attempt to explore the interior of the Great Eyrie. “You are right,” said our host, “until we all know what is hidden within there, our people will remain uneasy.”

“Has nothing new occurred,” I asked, “since the last appearance of flames above the Great Eyrie?”

“Nothing, Mr. Strock. From Pleasant Garden we can see the entire crest of the mountain. Not a suspicious noise has come down to us. Not a spark has risen. If a legion of devils is in hiding there, they must have finished their infernal cookery, and soared away to some other haunt.”

“Devils!” cried Mr. Smith. “Well, I hope they have not decamped without leaving some traces of their occupation, some parings of hoofs or horns or tails.

We shall find them out."

On the morrow, the twenty-ninth of April, we started again at dawn. By the end of this second day, we expected to reach the farm of Wildon at the foot of the mountain. The country was much the same as before, except that our road led more steeply upward. Woods and marshes alternated, though the latter grew sparser, being drained by the sun as we approached the higher levels. The country was also less populous. There were only a few little hamlets, almost lost beneath the beech trees, a few lonely farms, abundantly watered by the many streams that rushed downward toward the Catawba River.

The smaller birds and beasts grew yet more numerous. "I am much tempted to take my gun," said Mr. Smith, "and to go off with Nisko. This will be the first time that I have passed here without trying my luck with the partridges and hares. The good beasts will not recognize me. But not only have we plenty of provisions, but we have a bigger chase on hand today. The chase of a mystery."

"And let us hope," added I, "we do not come back disappointed hunters."

In the afternoon the whole chain of the Blueridge stretched before us at a distance of only six miles. The mountain crests were sharply outlined against the clear sky. Well wooded at the base, they grew more bare and showed only stunted evergreens toward the summit. There the scraggly trees, grotesquely twisted, gave to the rocky heights a bleak and bizarre appearance. Here and there the ridge rose in sharp peaks. On our right the Black Dome, nearly seven thousand feet high, reared its gigantic head, sparkling at times above the clouds.

"Have you ever climbed that dome, Mr. Smith?" I asked.

"No," answered he, "but I am told that it is a very difficult ascent. A few mountaineers have climbed it; but they report that it has no outlook commanding the crater of the Great Eyrie."

"That is so," said the guide, Harry Horn. "I have tried it myself."

"Perhaps," suggested I, "the weather was unfavorable."

"On the contrary, Mr. Strock, it was unusually clear. But the wall of the

Great Eyrie on that side rose so high, it completely hid the interior."

"Forward," cried Mr. Smith. "I shall not be sorry to set foot where no person has ever stepped, or even looked, before."

Certainly on this day the Great Eyrie looked tranquil enough. As we gazed upon it, there rose from its heights neither smoke nor flame.

Toward five o'clock our expedition halted at the Wildon farm, where the tenants warmly welcomed their landlord. The farmer assured us that nothing notable had happened about the Great Eyrie for some time. We supped at a common table with all the people of the farm; and our sleep that night was sound and wholly untroubled by premonitions of the future.

On the morrow, before break of day, we set out for the ascent of the mountain. The height of the Great Eyrie scarce exceeds five thousand feet. A modest altitude, often surpassed in this section of the Alleghanies. As we were already more than three thousand feet above sea level, the fatigue of the ascent could not be great. A few hours should suffice to bring us to the crest of the crater. Of course, difficulties might present themselves, precipices to scale, clefts and breaks in the ridge might necessitate painful and even dangerous detours. This was the unknown, the spur to our attempt. As I said, our guides knew no more than we upon this point. What made me anxious, was, of course, the common report that the Great Eyrie was wholly inaccessible. But this remained unproven. And then there was the new chance that a fallen block had left a breach in the rocky wall.

"At last," said Mr. Smith to me, after lighting the first pipe of the twenty or more which he smoked each day, "we are well started. As to whether the ascent will take more or less time—"

"In any case, Mr. Smith," interrupted I, "you and I are fully resolved to pursue our quest to the end."

"Fully resolved, Mr. Strock."

"My chief has charged me to snatch the secret from this demon of the Great Eyrie."

"We will snatch it from him, willing or unwilling," vowed Mr. Smith,

calling Heaven to witness. “Even if we have to search the very bowels of the mountain.”

“As it may happen, then,” said I, “that our excursion will be prolonged beyond today, it will be well to look to our provisions.”

“Be easy, Mr. Strock; our guides have food for two days in their knapsacks, besides what we carry ourselves. Moreover, though I left my brave Nisko at the farm, I have my gun. Game will be plentiful in the woods and gorges of the lower part of the mountain, and perhaps at the top we shall find a fire to cook it, already lighted.”

“Already lighted, Mr. Smith?”

“And why not, Mr. Strock? These flames! These superb flames, which have so terrified our country folk! Is their fire absolutely cold, is no spark to be found beneath their ashes? And then, if this is truly a crater, is the volcano so wholly extinct that we cannot find there a single ember? Bah! This would be but a poor volcano if it hasn’t enough fire even to cook an egg or roast a potato. Come, I repeat, we shall see! We shall see!”

At that point of the investigation I had, I confess, no opinion formed. I had my orders to examine the Great Eyrie. If it proved harmless, I would announce it, and people would be reassured. But at heart, I must admit, I had the very natural desire of a man possessed by the demon of curiosity. I should be glad, both for my own sake, and for the renown which would attach to my mission if the Great Eyrie proved the center of the most remarkable phenomena—of which I would discover the cause.

Our ascent began in this order. The two guides went in front to seek out the most practicable paths. Elias Smith and I followed more leisurely. We mounted by a narrow and not very steep gorge amid rocks and trees. A tiny stream trickled downward under our feet. During the rainy season or after a heavy shower, the water doubtless bounded from rock to rock in tumultuous cascades. But it evidently was fed only by the rain, for now we could scarcely trace its course. It could not be the outlet of any lake within the Great Eyrie.

After an hour of climbing, the slope became so steep that we had to turn,

now to the right, now to the left; and our progress was much delayed. Soon the gorge became wholly impracticable; its cliff-like sides offered no sufficient foothold. We had to cling by branches, to crawl upon our knees. At this rate the top would not be reached before sundown.

"Faith!" cried Mr. Smith, stopping for breath, "I realize why the climbers of the Great Eyrie have been few, so few, that it has never been ascended within my knowledge."

"The fact is," I responded, "that it would be much toil for very little profit. And if we had not special reasons to persist in our attempt."

"You never said a truer word," declared Harry Horn. "My comrade and I have scaled the Black Dome several times, but we never met such obstacles as these."

"The difficulties seem almost impassable," added James Bruck.

The question now was to determine to which side we should turn for a new route; to right, as to left, arose impenetrable masses of trees and bushes. In truth even the scaling of cliffs would have been more easy. Perhaps if we could get above this wooded slope we could advance with surer foot. Now, we could only go ahead blindly, and trust to the instincts of our two guides. James Bruck was especially useful. I believe that that gallant lad would have equaled a monkey in lightness and a wild goat in agility. Unfortunately, neither Elias Smith nor I was able to climb where he could.

However, when it is a matter of real need with me, I trust I shall never be backward, being resolute by nature and well-trained in bodily exercise. Where James Bruck went, I was determined to go, also; though it might cost me some uncomfortable falls. But it was not the same with the first magistrate of Morganton, less young, less vigorous, larger, stouter, and less persistent than we others. Plainly he made every effort, not to retard our progress, but he panted like a seal, and soon I insisted on his stopping to rest.

In short, it was evident that the ascent of the Great Eyrie would require far more time than we had estimated. We had expected to reach the foot of the rocky wall before eleven o'clock, but we now saw that mid-day would still find

us several hundred feet below it.

Toward ten o'clock, after repeated attempts to discover some more practicable route, after numberless turnings and returnings, one of the guides gave the signal to halt. We found ourselves at last on the upper border of the heavy wood. The trees, more thinly spaced, permitted us a glimpse upward to the base of the rocky wall which constituted the true Great Eyrie.

"Whew!" exclaimed Mr. Smith, leaning against a mighty pine tree, "a little respite, a little repose, and even a little repast would not go badly."

"We will rest an hour," said I.

"Yes; after working our lungs and our legs, we will make our stomachs work."

We were all agreed on this point. A rest would certainty freshen us. Our only cause for inquietude was now the appearance of the precipitous slope above us. We looked up toward one of those bare strips called in that region, slides. Amid this loose earth, these yielding stones, and these abrupt rocks there was no roadway.

Harry Horn said to his comrade, "It will not be easy."

"Perhaps impossible," responded Bruck.

Their comments caused me secret uneasiness. If I returned without even having scaled the mountain, my mission would be a complete failure, without speaking of the torture to my curiosity. And when I stood again before Mr. Ward, shamed and confused, I should cut but a sorry figure.

We opened our knapsacks and lunched moderately on bread and cold meat. Our repast finished, in less than half an hour, Mr. Smith sprang up eager to push forward once more. James Bruck took the lead; and we had only to follow him as best we could.

We advanced slowly. Our guides did not attempt to conceal their doubt and hesitation. Soon Horn left us and went far ahead to spy out which road promised most chance of success.

Twenty minutes later he returned and led us onward toward the northwest. It was on this side that the Black Dome rose at a distance of three or four miles.

Our path was still difficult and painful, amid the sliding stones, held in place only occasionally by wiry bushes. At length after a weary struggle, we gained some two hundred feet further upward and found ourselves facing a great gash, which, broke the earth at this spot. Here and there were scattered roots recently uptorn, branches broken off, huge stones reduced to powder, as if an avalanche had rushed down this flank of the mountain.

"That must be the path taken by the huge block which broke away from the Great Eyrie," commented James Bruck.

"No doubt," answered Mr. Smith, "and I think we had better follow the road that it has made for us."

It was indeed this gash that Harry Horn had selected for our ascent. Our feet found lodgment in the firmer earth which had resisted the passage of the monster rock. Our task thus became much easier, and our progress was in a straight line upward, so that toward half past eleven we reached the upper border of the "slide."

Before us, less than a hundred feet away, but towering a hundred feet straight upwards in the air rose the rocky wall which formed the final crest, the last defence of the Great Eyrie.

From this side, the summit of the wall showed capriciously irregular, rising in rude towers and jagged needles. At one point the outline appeared to be an enormous eagle silhouetted against the sky, just ready to take flight. Upon this side, at least, the precipice was insurmountable.

"Rest a minute," said Mr. Smith, "and we will see if it is possible to make our way around the base of this cliff."

"At any rate," said Harry Horn, "the great block must have fallen from this part of the cliff; and it has left no breach for entering."

They were both right; we must seek entrance elsewhere. After a rest of ten minutes, we clambered up close to the foot of the wall, and began to make a circuit of its base.

Assuredly the Great Eyrie now took on to my eyes an aspect absolutely fantastic. Its heights seemed peopled by dragons and huge monsters. If

chimeras, griffins, and all the creations of mythology had appeared to guard it, I should have been scarcely surprised.

With great difficulty and not without danger we continued our tour of this circumvallation, where it seemed that nature had worked as man does, with careful regularity. Nowhere was there any break in the fortification; nowhere a fault in the strata by which one might clamber up. Always this mighty wall, a hundred feet in height!

After an hour and a half of this laborious circuit, we regained our starting-place. I could not conceal my disappointment, and Mr. Smith was not less chagrined than I.

"A thousand devils!" cried he, "we know no better than before what is inside this confounded Great Eyrie, nor even if it is a crater."

"Volcano, or not," said I, "there are no suspicious noises now; neither smoke nor flame rises above it; nothing whatever threatens an eruption."

This was true. A profound silence reigned around us; and a perfectly clear sky shone overhead. We tasted the perfect calm of great altitudes.

It was worth noting that the circumference of the huge wall was about twelve or fifteen hundred feet. As to the space enclosed within, we could scarce reckon that without knowing the thickness of the encompassing wall. The surroundings were absolutely deserted. Probably not a living creature ever mounted to this height, except the few birds of prey which soared high above us.

Our watches showed three o'clock, and Mr. Smith cried in disgust, "What is the use of stopping here all day! We shall learn nothing more. We must make a start, Mr. Strock, if we want to get back to Pleasant Garden to-night."

I made no answer, and did not move from where I was seated; so he called again, "Come, Mr. Strock; you don't answer."

In truth, it cut me deeply to abandon our effort, to descend the slope without having achieved my mission. I felt an imperious need of persisting; my curiosity had redoubled. But what could I do? Could I tear open this unyielding earth? Overleap the mighty cliff? Throwing one last defiant glare at the Great

Eyrie, I followed my companions.

The return was effected without great difficulty. We had only to slide down where we had so laboriously scrambled up. Before five o'clock we descended the last slopes of the mountain, and the farmer of Wildon welcomed us to a much needed meal.

"Then you didn't get inside?" said he.

"No," responded Mr. Smith, "and I believe that the inside exists only in the imagination of our country folk."

At half past eight our carriage drew up before the house of the Mayor of Pleasant Garden, where we passed the night. While I strove vainly to sleep, I asked myself if I should not stop there in the village and organize a new ascent. But what better chance had it of succeeding than the first? The wisest course was, doubtless, to return to Washington and consult Mr. Ward.

So, the next day, having rewarded our two guides, I took leave of Mr. Smith at Morganton, and that same evening left by train for Washington.
